Additions to the text are included in **bold** and underlined

Deletions are ~~struck through~~

<u>YERUN amendments to the Annexes of the Regulation of Horizon Europe</u>			
	EC Proposal	Revision proposed	Rationale
Page 16, Annex V, societal impact pathway indicators table, 3 rd row, 1 st column short term	<i>Outputs - Number and share of outputs aimed at addressing specific EU policy priorities</i>	Outputs - Number and share of FP projects where EU citizens and that address a societal need - whether or not being tackled by a technological solution - where societal actors (including citizens and end-users) are involved either in project conception or project execution- contribute to the co-creation of R&I content.	Rationale added: co-creation of knowledge by involvement of citizens is important, but not sufficient to secure the uptake of innovation in society. Societal concerns should be taken into consideration in setting the agenda and in defining priorities. Hence, we suggest to broaden the proposed definitions in short and medium term.
Page 16, Annex V, societal impact pathway indicators table, 3 rd row, 2 nd column medium term	<i>Engagement – Number and share of FP beneficiary entities with citizen and end-users engagement mechanisms after FP project</i>	Number and share of beneficiary entities with citizens and end-users engagement mechanisms <u>FP projects that address a societal need (whether or not being tackled by a technological solution) that deliver results that are implemented by</u>	Rationale added: co-creation of knowledge by involvement of citizens is important, but not sufficient to secure the uptake of innovation in society. Societal concerns should be taken into consideration in setting the agenda and

		<u>and/or serve societal actors (including citizens and end-users)</u> after the FP project.	in defining priorities. Hence, we suggest to broaden the proposed definitions in short and medium term.
Page 16, Annex V, title Economic/innovation impact pathway indicators	<i>Economic/innovation impact pathway indicators</i>	Economic impact <u>and</u> innovation pathway indicators	Through the entire proposal, impact is referred as: social, scientific and/or economic. Only at the end of this annexe, it is included as indicator the economic/innovation impact. It is either economic or innovation. This is confusing and we propose to refer to them separately, economic and innovation impact.
<u>YERUN amendments to the Annexes of the Decision Specific Programme of Horizon Europe</u>			
	EC Proposal	Revision proposed	Rationale
Page 7, Annex I, ERC, Areas of Intervention, Broad lines, second bullet point. Replace it by the revision proposed.	– <i>Starting researchers with excellent ideas to make the transition to independence while consolidating their own research team or programme;</i>	- Providing early and mid-career researchers with enhanced instruments to develop or consolidate their own research team and lines and, by doing so, facilitate their transition to independence in the most productive phase of their career;	European Early Career Researchers will, if adequately nurtured and supported, become the next generation of world-leading scholars, investigators and innovators. The success and reputation of future European research excellence depends upon adequate investment being made now in the step-wise processes that will transform our early career talents into an internationally recognised European research and innovation force.
